Agapenet is offering a very unique fundraising program where you can tap into the fast-growing Internet Access industry to raise funds for your organisation. Let our fundraising program help you build a continuous revenue source without much effort on your part. Consider these points in favor of participating in fundraising with Agapenet.

1) In normal fundraising activities, you usually find yourself trying to convince someone to donate money or buy something they really don't want, often don't need or don't use. Internet service is something people want, need and use. When they referred by you, they will be using something they want at a competitive price. They will also have the satisfaction of knowing that your organisation will be benefiting from their contribution.

2) Ordinary fundraising rarely generates continuous revenue. After each fundraiser you have to get your group together and figure out what to do next to meet your objectives. Bake sales, raffles, car washes, pizza or candy sales, auctions, rummage sales, all can raise money for your group but must be done over and over. Referring your supporters to change to or to use Agapenet.com.au generates income not only now, but month after month, year after year.

3) Ordinary fundraising often requires a substantial investment, as the group must pre-purchase the candy, cards, pizza, etc. or offer a guarantee of "X" amount of sales. Often groups are struggling to break even after their investment. With Agapenet, no initial investment is necessary.

4) Agapenet has accessed the largest independant internet infrastructure providers in Australia. This enables us to provide our services to over 98% of Australian households & businesses, using the latest state-of-the-art Technology. Like our partners, we are here for the long haul.

5) Agapenet has been providing internet access from early 2000. We've got the experience and our rates Australia-wide are very competitive.
